

Scope of works

Beatties were delighted to be awarded the electrical contract for a new modern country house situated in the Upham country side. The House had 7 Bedrooms, an Indoor Swimming Pool, Steam Room, Cinema and Gym. The project also included two, two bed houses built as part of the same development.

Greenhill Farm Electrical Install

LOCATION: Upham

CLIENT: Hemdean

Overview

The lighting was installed and interfaced with a software called 'Control 4' which enabled it to be controlled locally and via a tablet remotely. The software was also interfaced with the heating system. This allowed the client a full, user friendly system to manage the home.

As part of the contract Beatties were also responsible for the electrical installation for the two, two bed properties.

Beatties install duties included;

- LV Mains & Sub-Main Distribution
- Internal & External Lighting
- Small Power Installation
- Cable Management Installation
- Fire Alarm Cabling Installation
- Data Distribution
- Full Audio/Visual Installation

The build took 2 years to complete, in which Beatties remained on site for the duration.
