

Scope of works

Beatties were awarded with the refurbishment works for a new dining area situated off of the food hall in West Quay shopping centre.

Beatties worked with the supplier to design a lighting layout that would create the right ambience for the new area. Once this was finalised, the new lights were installed throughout and linked to the existing central battery emergency system.

Our scope of works also included the painting and decorating of the ceilings and restoring the existing engineered oak floor by sanding, oiling and applying polyurethane hardwood floor finish. This created an overall fresh and new look.

We worked out of hours to ensure the project was completed efficiently and in a timely manner to allow the space to be utilised by the customers as soon as possible.

Shopping Centre, Dining Area Refurbishment
