

# Scope of works

Beatties are pleased to have completed the M&E installation at a Farnham based Secondary School with LST Projects.

The works consisted of stripping out the existing services and carrying out a full refurbishment to a new food technology classroom, girls toilets and staff room.

The project also involved adding new services to existing systems which required careful consideration throughout the project, with only a short timeframe to complete it. All works were achieved on time and the customer was very satisfied with the result.

## Overview

Beatties works included the following;

### **Mechanical -**

- Mechanical supply & extract ventilation systems, including ductwork
- Daikin Air Conditioning
- Installation of sanitary ware
- Hot & cold water supplies
- Above ground drainage
- Water treatment of the systems

# Secondary School

## M&E Contractor
